

OPTO 22

SNAP PAC Racks—Assembly and Installation

You can mount the SNAP PAC rack on a DIN rail or panel.

For DIN-rail clips and all assembly instructions:

1. Go to <http://docs.opto22.com> and enter your rack part number in the search box.
For example, enter: **SNAP-PAC-RCK8**
2. Open the *SNAP PAC Racks Data Sheet* (form 1684) for instructions.

Suggestions for easy wiring

- Use the **SNAP-STRAPB** to make jumper connections on a 4-channel SNAP digital I/O module or the **SNAP-STRAP-OMR** for SNAP-OMR6 modules.
- Connect SNAP-STRAPs on multiple modules with the **SNAP-WIRESTRAPB**.

See more wiring suggestions in the *SNAP TEX Cables and Breakout Boards Data Sheet* (form 1756) and the *SNAP TEX Mounting/Wiring Tools Data Sheet* (1772).
